TITLE i
DEDICATIONS..... ii
DECLARATION BY THE CANDIDATE..... iii
DECLARATIONBY THE GUIDES..... iv
ANTI-PLAGIARISM CERTIFICATE-..... v-vii
ACKNOWLEDGEMENT..... viii-ix
PREFACE..... ix
CONTENTS..... x- xv
ABSTRACT..... xvi-xxii

CHAPTER 1
INTRODUCTION AND MOTIVATION..... 1-9
1.1 Introduction..... 1
1.2 Aims and Objectives..... 3
1.3 Expected Outcome..... 4
1.4 Material and Methods..... 4
1.5 Importance of the Present Work..... 7
1.6 Motivation..... 7
1.7 List of Nonlinear Differential Equation used 8
CHAPTER 2
REVIEWOFLITERATURE 10-34
2.1 Historical Overview of Solitons. 10
2.2 Explicit Construction of the KdV Soliton..... 12
2.3 KdV Soliton Solution 14
2.4 The Solitary Wave Menagerie..... 15
2.4.1 Envelope Solitons 15
2.4.2 Solitary Waves With Discontinuous Derivatives: 16
2.4.3 Gap Solitons..... 16

2.4.4 Intrinsic Localized Modes ……. ……... 16
2.4.5 Q-Breathers ……: ……. 16
2.4.6 Topological Solitons . ……..…….. 17
2.4.7 Kinks .....: …….. 17
2.4.8 Vortex Solitons …….:……..... 17
2.4.9 Dissipative Solitons…….…….. 17
2.4.10 Oscillons …….:…….. 18
2.4.11 Higher-Dimensional Solitary Waves …… …… 18
2.5. Applications…… 18
2.5.1 Nonlinear Optics…….… 19
2.5.2 Bose–Einstein Condensates ……. 20
2.5.3 Water Waves…… 22
2.5.4 Biophysics ……. 23
2.5.5 Microelectromechanical andNanoelectromechanical Devices ……. 24
2.5.6 Josephson Junctions …….. 24
2.5.7 Granular Crystals …… 25
2.5.8 Surface Waves …..……..…… 26
2.5.9 Plasmas ……..…… 27
2.5.10 Field Theory ……..……... 28

2.6 Nonlinear System……. 29
2.7 Examlpes Of Linear Systems 29
2.8 Examlpes Of Nonlinear Systems ..... …… 30
2.9 Nonlinear Differential Equations…..... …… 30
2.10 Integrable Systems.....….…….... 31
2.11. List of Some Well-Known Classical Integrable Systems …… 31
2.12 Inverse Scattering Transform..... 33
2.13 Zakharov–Shabat System.....…..... ….... 33
2.14 AKNS .....…..... …… 34

CHAPTER 3

LATTICE DISCRETIZATION APPROACH TO NONLINEAR DIFFERENTIAL EQUATIONS…… 35-42

3.1Introduction…….…..…… 35
3.2 General Method Of Solution. ……... 36
3.3 Method Of Solution……..... 36
3.4 Nonlinear Schrödinger Equation (NLS)…….. 37
3.5 Matlab Program To Plot The Out Put Of The Equation..... 37
3.6 Toda Lattice…….. 38
3.7 Solutions Of The Toda Lattice For Various Parameters. …… 39
3.8 Klein-Gordon Equation……..... 40
3.9 Conclusion……... 42

CHAPTER 4

LONG WAVE LENGTH SOLITON SOLUTIONS OF NAVIER STOKES EQUATION…….. 43-49

4.1 Introduction.....……. 43
4.2 Navier Stokes equation..... 43
4.3Nonlinearity..... 44
4.4 Turbulence..... 44
4.5 Equilibrium Behavior.....…….. …… 47
4.6Long Wave Length Solutions ……..…… 47
4.7Navier Stokes Equationin long wave length ……..... 48
4.8Conclusion.……. 49

CHAPTER 5

LONG WAVE LENGTH SOLITON SOLUTION OF KDV (PAPER PRESENTED AT IIT CHENNAI)……50-55

5.1 Introduction ……...…… 50
5. 2Korteweg–De Vries equation……. 51

5.3 Conclusion ……..…… 55

CHAPTER 6

LONG WAVE LENGTH SOLITON SOLUTIONS OF SINE GORDON EQUATION…….. 56-60

6.1 Introduction ……. 56

6.2 Sine Gordon EquationIn The Long Wave Length Limit…….…….. 57

6.3 Conservation Equation…… 59

6.4 Application to Josephson Junctions……. 59

6.5. Conclusion…….. 60

CHAPTER 7

DOMAIN WALL SOLITON SOLUTION IN NONLINEAR OPTICAL LATTICES 61-70

7.1 Introduction. …… 61

7.2 Optical Lattices…… 62

7.3 Model…… 63

7.4 One Dimensional lattice ……..…… 64

7.5 Two Dimensional lattice ……..... 65

7.6 Tunneling…….... 68

CHAPTER 8

LONG JOSEPHSON JUNCTION IN MAGNETIC FIELD..... 71-79

8.1 Introduction……..... 71

8.2 Lattices…… 71

8.3 Josephson Junction…… 72

8.4 Physical Basis…… 73

8.5Solution Of The Sine Gordon Equation In Asymptotic Limit …….. 74

8.6 Lax Operatres…… 77

8.7 Bound states of the Kink-antikink…… 78

8.8Gelfand-Levitan Equation…….. 78

8.9 Conclusion…… 79

CHAPTER 9

VORTEX SOLITONS IN POLYACETYLENE…….. 80-89

9.1Polyacetylene…….. 80

9.2Structure of poly acetylene…….. 80

9.3 Introduction ……..……... 81

9.4 Model…… 83

9.5 Vortex Solitons……. 85

9.6Energy Gaps In The Presence Of Vortices……... 87

9.7 Charge and Spin States of Vortices…….. 89

9.8 Conclusion…… 89

CHAPTER 10

SOLITON SOLUTION OF THE UNPERTURBED SINE-GORDON AND PERTURBED SINE-GORDON EQUATION …… 90-95

10. 1 Introduction: ……. 90

10.2 Perturbed Sine-Gordon Equation…….. 90

10.3 Eigenvalues Of The Spatial Evolution Equation …… 91

10.4 Perturbation Expansion……..... 95

10.5Conclusion…….. 97

CHAPTER 11

CONCLUSIONS AND FUTURE WORK……..... 98-102

11.1 Conclusions……. 98

11.2 Future work……. 102

REFERENCES:…….103-114

APPENDIX…….. 115-149

I. LIST OF PAPERS PUBLISHED (IN PDF)……. 115-149

II. **INTERNATIONAL CONFERENCES ATTENDED AND PAPERS PRESENTED…….. 115**

1. Lattice discretization Approach to nonlinear differential equations …… 116-122
2. Long wave length soliton solutions of Navier Stokes equation (Chap 4).. 123-127
3. Long wave length Tanh soliton solution of KdV (Chap 5)…….. 128-130
4. Long wave length Tanhsoliton solutions of Sine Gordon equation (6)… 131-133
5. Soliton in Nonlinear Optical Lattices (Chap7)..... 134-137
6. Long Josephson junction in Magnetic Field (Chap 8)..... 138-140
7. Vortex solitons in Poly-Acetylene (Chap 9)…… 141-145
8. Soliton solution of the unperturbed Sine-Gordon and perturbed Sine-Gordon equation (Chap 10)…… 146-149
